The figure displays the 'Time Series Analysis' tool interface. The top section features a time series plot with several peaks. Below the plot, there are seven boxes, each containing a small histogram and statistical data for a specific peak. The data includes Kurtosis (x), Skewness (y), Deviation (σ), and Correlation (ρ). The bottom section shows two zoomed-in views of the time series plot, highlighting specific peaks. The left zoom shows a peak with Kurtosis 6, Skewness 0.46, Deviation 0.3, and Correlation 0.4. The right zoom shows a peak with Kurtosis 5.86, Skewness 0.46, Deviation 0.3, and Correlation -0.12. The bottom right corner has a 'x Remove' button.
